

MUHAMMAD ANAS

AI & Data Science Enthusiast | CS @ FAST NUCES, Karachi

muhammadanasashfaq2006@gmail.com | Karachi, Pakistan | <https://linkedin.com/in/muhammadanas20> | <https://github.com/muhammadanas20>

OBJECTIVE

CS student at FAST NUCES actively seeking a remote AI/ML internship (1-2 months) to gain hands-on experience in machine learning, data science, or AI application development. Eager to contribute, learn from practitioners, and apply academic knowledge to real-world problems.

EDUCATION

National University of Computer & Emerging Sciences (FAST NUCES)

2025 – Present

Bachelor of Science in Computer Science | Karachi, Pakistan | CGPA – 3.84

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Discrete Mathematics, Programming Fundamentals

TECHNICAL SKILLS

Languages: C++, JavaScript, HTML, CSS, Python (learning)

AI / Data Science: Fundamentals of ML, Data preprocessing, Python (NumPy, pandas — in progress)

Web Development: React JS, responsive UI design

Tools & Platforms: Git, GitHub, VS Code

Concepts: OOP, competitive programming, algorithm design

PROJECTS

AI Image Detector

<https://github.com/muhammadanas20/AI-Image-Detector>

C++ | *Pattern recognition simulation*

- Built a simulation of AI-based image detection logic using C++
- Applied OOP principles to model detection components and classification behavior
- Demonstrates understanding of how AI detection systems are structured at a conceptual level

Military Base Management System

<https://github.com/muhammadanas20/Military-Base-Managment-System>

C++ | *OOP System Design*

- Designed a multi-module management system using OOP principles in C++
- Implemented inheritance, polymorphism, and encapsulation across multiple interacting classes
- Received 2 stars and 2 forks from peers — indicates practical utility and code quality

Personal Portfolio Website

<https://anastrix.live/>

JavaScript, HTML, CSS

- Built and deployed a personal portfolio website from scratch using vanilla JS
- Responsive design with clean UI — demonstrates front-end capability

Competitive Programming/ Neet Code Practice

<https://github.com/muhammadanas20/compititive-programing>,
<https://github.com/muhammadanas20/neetcode-submissions>

C++ | *Algorithms & Problem Solving*

- Actively solving algorithmic problems covering arrays, recursion, sorting, and searching
- Strengthens core programming logic relevant to ML algorithm implementation

ACHIEVEMENTS & ACTIVITIES

- Spring'26 Gold Medalist
- CodersCup'25 Final Round
- Enrolled in AI & Data Science track alongside core CS curriculum
- Active on competitive programming platforms — building algorithmic problem-solving skills

CURRENTLY LEARNING

- *Python for Data Science (NumPy, pandas, matplotlib) • Machine Learning fundamentals (supervised/unsupervised learning) • scikit-learn • Data visualization*
- *Leetcode/Neetcode to gain command Over DSA*
